

# Stripe

[Stripe](#) is a powerful tool for processing payments, it provides an efficient method for generating revenue from your clients. Here's a step-by-step guide to help you integrate Stripe with Mixpost Enterprise and get started with processing payments:

## 1. Sign up for a Stripe Account

If you haven't already, head to [Stripe's website](#) and sign up for an account.

## 2. Access the Stripe Dashboard

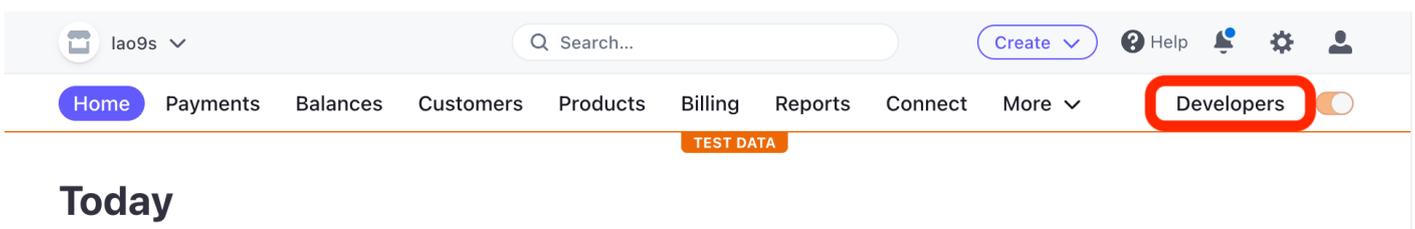

Once you've registered, log in to your Stripe account and access the Dashboard. This will be your primary interface for managing payments.

## 3. Get Your API Keys

From the Dashboard:

- Go to the "Developers" section.
- Click on "API Keys".
- You'll see two keys: a **Publishable Key** and a **Secret Key**. You'll need both for integration.

**Note:** Always keep your Secret Key confidential.

## Developers

### Standard keys

These keys will allow you to authenticate API requests. [Learn more](#)

NAME	TOKEN	LAST USED	CREATED
Publishable key	pk_test_d0pICPwMWSXF Bfp	Sep 25	Mar 5, 2018
Secret key	<input type="text" value="Reveal test key"/>	Sep 25	Mar 5, 2018

# 4. Integrate API Keys into Mixpost Enterprise

Once you have your API keys:

1. Open the Enterprise Console from the user menu.
2. Navigate to Settings -> **Payment Platforms**
3. Click on Stripe
4. Choose "Enabled" radio input
5. Input your **Publishable Key** and **Secret Key**.
6. Save

## 5. Set Up Webhooks

Webhooks allow Stripe to communicate with Mixpost Enterprise when certain events happen (e.g., a successful payment, subscription changes, etc.).

1. In your Stripe Dashboard, navigate to the "Developers" section.
2. Click on "Webhooks".
3. Here, you'll see the "+ Add endpoint" button. Click on it.
4. Input Endpoint URL "<https://your-app-url.com/mixpost/payment-webhook>".

5. Select "Listen to" to "Events on your account".
6. Select "Version" to "Latest API version (2023-08-16)".
7. Select the events the following events:
  - customer.subscription.created
  - customer.subscription.updated
  - customer.subscription.deleted
  - customer.updated
  - customer.deleted
  - invoice.payment\_succeeded
  - payment\_method.automatically\_updated
8. Click "Add endpoint" button

The screenshot shows the Stripe Developers interface for a user named 'lao9s'. The top navigation bar includes a search bar, a 'Create' button, and icons for Help, notifications, settings, and profile. Below this is a main navigation menu with links for Home, Payments, Balances, Customers, Products, Billing, Reports, Connect, and More. A 'Developers' toggle is visible on the right. A 'TEST DATA' button is located below the navigation menu. The main content area is titled 'Developers' and has a sub-navigation bar with links for Overview, API keys, Webhooks (highlighted with a red box), Events, Logs, and Apps. Below this, the section 'Hosted endpoints' is visible, with a '+ Add endpoint' button (also highlighted with a red box) on the right side.

# Listen to Stripe events

Add an endpoint

Test in a local environment

Set up your webhook endpoint to receive live events from Stripe or [learn more about Webhooks](#).

Endpoint URL

https://my-domain.com/mixpost/payment-webhook

Description

An optional description of what this webhook endpoint is used for...

Listen to

Events on your account

Events on Connected accounts

Version

Latest API version (2023-08-16)

Select events to listen to

+ Select events

Add endpoint

Cancel

After adding the endpoint, you should copy the signing secret into the Mixpost Enterprise Console:

1. In your Stripe Dashboard, navigate to the "Developers" section.
2. Click on "Webhooks".
3. Click on added Webhook.
4. Here, you'll see the "Signing secret" section and "Reveal" button, click on it.
5. Copy the "Signing secret"

The screenshot shows the Stripe Dashboard interface. At the top, there's a navigation bar with 'Home', 'Payments', 'Balances', 'Customers', 'Products', 'Billing', 'Reports', 'Connect', and 'More'. A 'Developers' toggle is visible on the right. Below the navigation bar, the 'Webhooks' section is active, displaying a table of webhooks. The first row shows a webhook with the URL 'https://my-domain.com/mixpost/payment-webhook'. The 'Signing secret' column for this webhook has a 'Reveal' button circled in red. Other columns include 'Status' (Enabled), 'Listening for' (7 events), 'API version' (2023-08-16), and 'Configuration' (View logs).

Status	Listening for	API version	Signing secret	Configuration
Enabled	7 events	2023-08-16	Reveal	View logs

1. Open the Enterprise Console from the user menu.
2. Navigate to Settings -> **Payment Platforms**
3. Click on Stripe
4. Input your **Signing secret** in "Webhook Signing secret"
5. Save

## 6. Add pricing plans

We are adding all the necessary pricing plans in both Stripe and Mixpost Enterprise.

1. In your Stripe Dashboard, navigate to the "Products" section.
2. Here, you'll see the "+ Add product" button. Click on it.
3. Give a plan name, for example: "Starter"
4. Scroll down to the "Price information" section
5. Select the "Standard pricing" model.

6. Input the plan price, for example: "\$9.00"
7. Select "Recurring"
8. Select "Billing period". Mixpost only accepts Monthly or Yearly billing periods.
9. If you are planning to sell your plan Monthly and Yearly, you can add another price, by clicking on the "+ Add another price" button.
10. Save product

The screenshot shows the Mixpost dashboard interface. At the top, there is a navigation bar with a search bar and a 'Create' button. Below the navigation bar, the 'Products' menu item is highlighted with a red box. In the main content area, the 'Products' section is visible, with a '+ Add product' button also highlighted with a red box. The dashboard includes various navigation options like Home, Payments, Balances, Customers, Billing, Reports, Connect, and More. There are also utility buttons for Filter, Export, and Add product.

# 7. Test the Integration

1. Try to register a user and subscribe to a plan.
2. Use Stripe's [test card](#) numbers to make sure the subscription is done correctly.

# 8. Go Live

Once you're confident in the integration:

1. Switch from using Stripe's test mode to live mode.
2. Ensure you've added any necessary pricing plans in both Stripe and your Mixpost Enterprise console.
3. Start onboarding users and generating revenue!

Here is how you can switch to Live:
