

# System Settings

## Allow users to create multiple workspaces

A workspace is the primary entity for billing. In other words, all charges, payments, and subscriptions are tied to the workspace, rather than the individual user. By default, the user can own only one workspace.

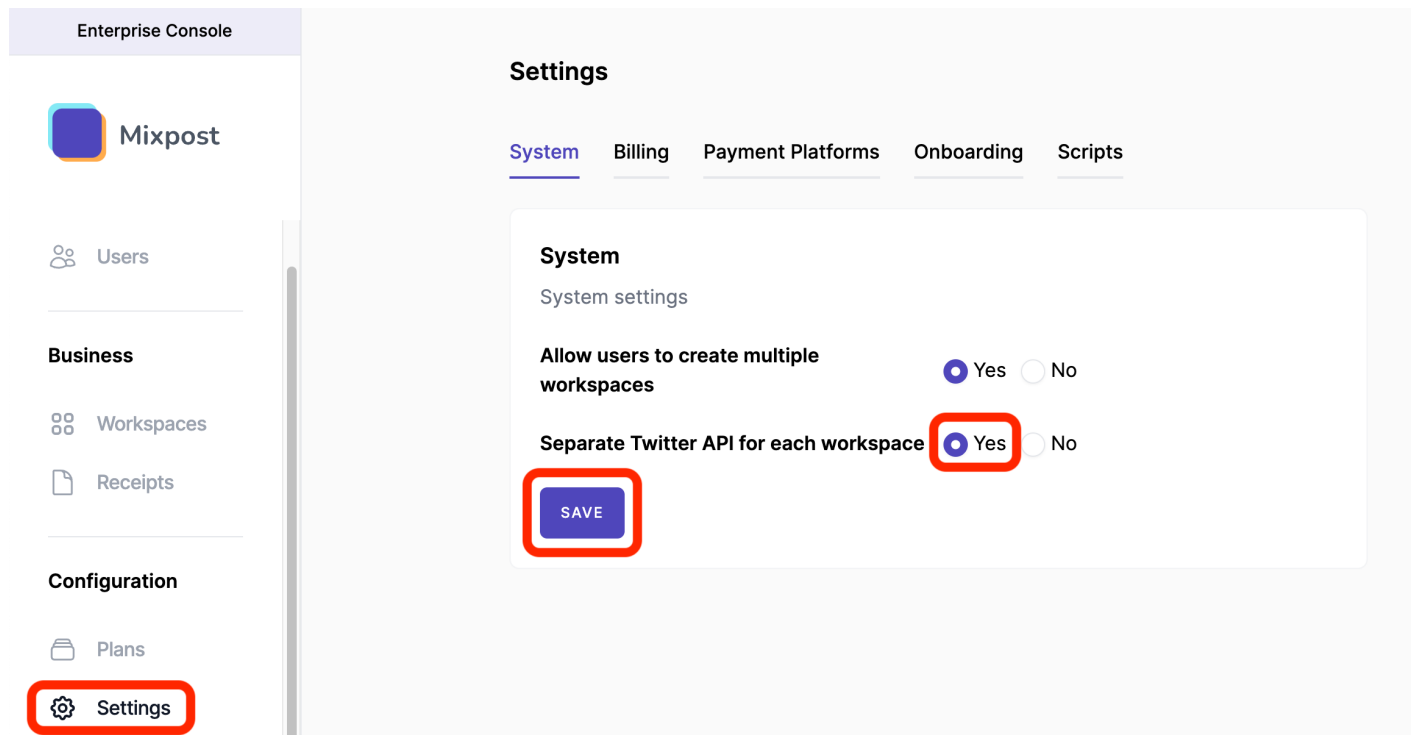

You may want Mixpost to allow users to own multiple workspaces:

1. Go to "**Enterprise Console**" (left-bottom user menu)
2. Click on "**Settings**" (left sidebar)
3. Here you will see "**Allow users to create multiple workspaces**"
4. Select "**Yes**"
5. Save

# Separate Twitter API for each workspace

In the context that Twitter API has a free limit, but the paid limit may be too high for some businesses at the beginning. However, the solution is to let the workspace administrator insert his Twitter Keys.
